Product information- SWAP series

Want to save energy and automate control of Motor, Lights ,AC, Heaters etc? Here is an easy way!! Check out our SWAP series products !

SWAP

Auto OFF Timers

Cyclic Timers

Automatic level controller & flow detector

SWAP To Save water and power…

Auto-OFF Timers

Product features

1. **Simple time selection –** No time settings.

2. Automatic switch off after the selected time.

3. Eight different time options.

4. **Led display indication** for selected time.

5. **Automatic execution of remaining time** in case of power interruption.

6. Universal contact design **suitable for AC and DC devices.** (can be used any where across the globe)

7. **Compact design** - Suitable for 2 Module box (25mm).

8. Surge voltage protection above 350V AC.

9. Electrically isolated power and control terminals.

10. Micro USB feature for backup control input (DC).

Benefits

1. **Saves water and power**.

2. Very useful to customers who often forget to switch off.

3. **User friendly-** Easy to operate. No language barrier .

4. **Micro USB** for emergency device operation.

5. Product operates from 85VAC to 305VAC.

Cyclic Timers

SWAP

Product features

1. *Simple Cycle time selections* – No settings.

2. Eight different cyclic time options.

3. *Led display indication* for selected time cycle.

4. *Automatic execution of selected time cycle* in case of power interruption.

5. Suitable for wide range of applications.(Air conditioners, Industrial equipment & agricultural pumps)

6. Add-on Features for *AC & Ceiling fan control*, smoke detection and alarm unit.

7. Universal contact design *suitable for AC and DC devices.*(can be used any where across the globe)

8. Electrically isolated power and control terminals.

9. *Compact design* – Suitable for 2 Module box (25mm).

10. Surge voltage protection above 350V AC.

Benefits

1. *Saves water and power*.

2. Very useful to customers in need of cyclic load control.

3. *User friendly-* Easy to operate. No language barrier.

4. Auto resumption feature provides users comfort *(user presence not required to switch ON),in case of power interruption.*

5. Suitable for wide range of applications including sign board, compound & street lightings.

6. *Suitable to use anywhere across the globe.*

Automatic Level controllers
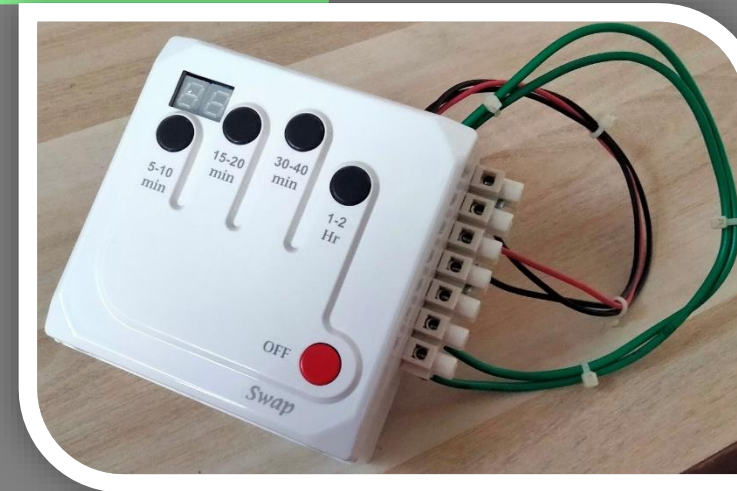

SWAP

Product features

1. **Two in one product**- Automatic level controller & manual Auto-OFF timer.

2. Automatic water level control for both sump & over head tank.

3. **Corporation Water flow sensing feature** to switch ON the motor automatically.

4. Dry run protection.

5. Level control feature also for submersible pumps.

6. **Can be used as stand alone auto OFF timer** with 8 different time options.

7. **Automatic execution of selected time** in case of power interruption.

8. Electrically isolated power and control terminals.

9. **Compact design** – Suitable for 2 Module box (25mm).

10. Surge voltage protection above 350V AC.

Benefits

1. **Saves water and power**.

2. Auto-off timer for **emergency tank filling** (during scheduled power cut).

3. **Dry run protection feature** safeguards submersible pumps.

4. **Extremely Safe low voltage** for level sensor float switch (**Feel safe & never get shock from water, using this device**).

Programmable Timers

SWAP

Product features

1. ***Simple time setting as the Information printed on the product front plate itself.***

2. ***Customizable time program either in seconds/minutes /hours.***

3. Options available to view the set time without switching on the load.

4. Timer with count down option also available.

5. Automatic switch off after the selected time.

6. ***Led display indication*** for selected time.

7. ***Automatic execution of remaining time*** in case of power interruption.

8. Universal contact design ***suitable for AC and DC devices.***(can be used any where across the globe)

9. ***Compact design*** - Suitable for 2 Module box (25mm).

10. Surge voltage protection above 350V AC.

11. Electrically isolated power and control terminals.

Benefits

1. ***Saves water and power***.

2. Can set any time as per your requirement.

3. Very useful to customers who often forget to switch off.

4. ***User friendly-*** Easy to operate.

5. Product operates from 85VAC to 305VAC.

6. Tested according to IEC/IS-60669-2.

To set the time:
1. Click/hold +1 button
2. Click/hold +5 button
3. Hold the Set button until display turns off.
4. Press OFF button, and then Start button.

+1   +5   Set   Start   OFF

Programmable Cyclic Timer

SWAP

Product features

1. *Simple cycle time setting as the Information printed on the product front plate itself.*

2. *Customizable cycle time program either in seconds/minutes /hours.*

3. Options available to view the set time without switching on the load.

4. *Led display indication* for selected time.

5. *Automatic execution of same Cycle* in case of power interruption.

6. Universal contact design *suitable for AC and DC devices.* (can be used any where across the globe)

7. *Compact design* - Suitable for 2 Module box (25mm).

8. Surge voltage protection above 350V AC.

9. Electrically isolated power and control terminals.

Benefits

1. *Saves water and power.*

2. Can set any cycle time as per your requirement.

3. Very useful to customers who often forget to switch off.

4. *User friendly-* Easy to operate.

5. Product operates from 85VAC to 305VAC.

6. Tested according to IEC/IS-60669-2.

To set the Cyclic time:
1. Click/hold the ON+ button for ON time.
2. Click/hold the OFF+ button for OFF time.
3. Hold the Set button until display turns off.
4. Press OFF button, and then Start button.
